Continuation of 2. NOTE: the proposed changes to the claim language broadens the scope of the claims, and therefore requires further consideration and search.

Continuation of 5. does NOT place the application in condition for allowance because: applicant's arguments are focused on the creation of a means or information that actively identifies style of rendition information, whereas the scope of the claims merely has information that portrays a style of rendition. Examiner has shown in Mohrbacker providing information that conveys the musicians rendition of a piece of music. Examiner notes in particular on page 9 of the arguments that Mohrbacker discloses melody, bass, chord, scale, etc., information which portrays that specific style of rendition by the musician. Examiner also notes that the difference between the prior art of record and the applicant's specification is the method in which this information is generated; and focusing on amending the claim language on how this information is generated could overcome the prior art of record.
